This 12" woofer has been designed to offer long excursion capabilities (large foam half-roll suspension) coupled with high efficiency and good power handling. The low resonance and long edgewound flat copper wire voice coil makes it suited for subwoofer applications. The gold plated binding posts fitted onto the die cast chassis offer the possibility of using large diameter cables. The "suggested applications" charts indicate various driver loads. The response curves shown on the diagram indicate the predicted low end response of the driver in the suggested box volume (Vb) with suggested port (Dp-Lp).

Ce haut-parleur de 300 mm a été développé pour offrir la possibilité de grandes élancements (large suspension 1/2 rouleau en mousse) associée à une bonne tenue en puissance et un rendement élevé. Sa résonance très basse ainsi qu'une bobine longue sur support Kapton en fil de cuivre plat sur chant le destinent à une utilisation en grave ou subwoofer. Son châssis Zamak moulé est équipé de borniers plaqués or permettant l'utilisation de câbles de forte section. Le tableau "Suggested applications" indique différents types de charge. Les courbes publiées correspondent à la réponse dans le grave pour un volume (Vb) et une dimension d'évent donnée (Dp-Lp).
