**PROFESSIONAL LINE**

Very high efficiency - 100 dB  
 High power 150 W  
 Foam suspension  
 Ultra stiff die cast chassis  
 Heat sink design  
 Vented pole piece  
 Kapton voice coil former (70 mm Ø)  
 Gold plated binding post

Très haut rendement - 100dB  
 Puissance élevée 150 W  
 Suspension mousse  
 Châssis moulé ultra-rigide  
 Ailettes de refroidissement - Noyau ventilé  
 Bobine sur support Kapton (Ø 70 mm)  
 Fil cuivre plat sur chant  
 Bornes plaquées or

This 15" Woofer is especially designed for high quality studio monitoring systems and offers large excursion capabilities for deep bass (Large half-roll foam surround). Mounted in a QB3 alignment vented box, the system can produce strong, distortion free bass down to 30 Hz. The large magnet has a vented pole piece and is heatsinked to the Zamak chassis to maximize heat dissipation. A long, flat, edgewound copper wire voice coil is mounted onto a fiberglass reinforced Kapton former for exceptional power handling. Gold plated binding posts fitted onto the Ultra stiff die cast chassis are designed to accept large diameter cables. The "suggested applications" charts indicate various driver loads. The response curves shown on the diagram indicate the predicted low end response of the driver in the suggested box volume (Vb) with suggested port (Dp-Lp).

Ce haut-parleur de grave de 380 mm est particulièrement destiné à une utilisation en studio monitor. La suspension demi-rouleau en mousse permettant de grandes élongations est associée à une bobine longue sur support Kapton renforcé fibre de verre à fil de cuivre plat sur chant. Le saladier à ailettes de refroidissement ainsi que le noyau ventilé permettent une dissipation optimale de la chaleur. Il en résulte un rendu des graves sans distorsion jusqu'à 30 Hz avec un alignement QB3. Le châssis Zamak moulé est équipé de bornes plaquées or permettant l'utilisation de câbles de forte section. Le tableau "Suggested applications" indique différents types de charge. Les courbes publiées correspondent à la réponse dans le grave pour un volume (Vb) et une dimension d'évent donnée (Dp-Lp).
